

Victims of Emotional ABUSE: Understanding & Overcoming the PAIN: -- Surviving Liars, Cheaters, Betrayal, Narcissistic Personality, Pathological Liars, ... Behavior (Emotional Abuse Recovery Book 2)

This true story is the second in a series aimed at helping victims of emotional abuse cope and recover. If you're not a victim it may help you or someone you know avoid becoming one. And it provides valuable insights for those in helping professions whose clients have suffered abuse as well as family members and friends who want to better understand so they can better be of support to their abused loved ones. The story focuses on emotional abuse in a marriage or other intimate relationship. It has relevance to other types of relationships as well where emotional abuse is or has been present. Abusers can appear to be everyday people. But their destructive behaviors can have extreme effects on innocent people who don't deserve such treatment. Sometimes the abusers are described by such terms as compulsive liars, cheaters (infidelity), narcissists, sociopaths, sexual addicts and anti-social. The world may see them as charming but that charm can soon turn to deception, manipulation and betrayal. Lying and cheating are common behaviors for these individuals. Behaviors that can cause great harm but may go undetected, even for years. This book series provides a close-up look into a real life love story affected by emotional abuse. A story where multiple lives have been affected. A story that others can learn from in order to shut down the abuse and the pain it brings. The story is told in a can't put the book down kind of way that makes readers want to know more and now. It is being called Powerful, Shocking, A Valuable Tell All Story. The author tells it with skill and sensitivity to all concerned, with a genuine goal of being of service to others. The author lives and works in North Carolina. She is a life coach committed to supporting others, each on their own life journey. She believes that valuable lessons come from all life experiences, both good and bad. The true story is her own.
