

Curing Irritable Bowel Syndrome: Dealing With IBS Naturally!

Are IBS Symptoms Ruling Your Entire Life? Do You Want The Digestive System You Were Born With Back? Heal Irritable Bowel Syndrome The Natural Way! Stop Making Things Worse By Using Dangerous Prescription and Over-The-Counter Drugs? Have you become paralyzed by the symptoms of Irritable Bowel Syndrome? Are you weary of the nausea, cramps, bloating, gas, constipation and sexual fears caused by this uncomfortable yet very common condition? Do you want to avoid taking the pain relievers, antispasmodics and antidepressants prescribed for IBS because you do not like the unpleasant side effects such as weight gain, mood swings, dental decay and more? Stop Avoiding Life Because of IBS... Feel Better Within Days! I know what you are going through - I too suffer from Irritable Bowel Syndrome. Everything from your ability to exercise to the look of your skin to your mood can be affected by the constipation and other problems associated with Irritable Bowel Syndrome. Having IBS can be pretty painful. You never know what to expect from one day to the next! You are either running to the toilet with a serious case of the runs or so constipated that you can barely move. I got so sick of being sick one day that I went out in search of a way to manage my symptoms without taking pain relievers that knocked me out and happy drugs with long term side effects that are unknown because they have not been around long enough. I found the answers and they are detailed in everyday language in my new audiobook! I concisely and thoroughly discuss everything there is to know about the causes, symptoms and diagnosis of IBS including: What role stress plays in causing IBS What it means to have a sensitive colon How doctors determine how severe the condition is in any individual sufferer Why the condition of Irritable Bowel Syndrome is so difficult

to diagnose in the first place! A description of the other medical conditions and afflictions that IBS shares symptoms with and is commonly confused with! A discussion of both the Manning Criteria and the Rome III Criteria which are used by doctors to officially diagnosis a case of IBS Why both loose bowels and constipation are both symptoms of the condition What types of bowel movements to look for in your toilet bowel that may indicate that you have IBS The physical symptoms that many people suffer when they have IBS What anxiety or depression may have to do with IBS How allopathic doctors test for a positive diagnosis of IBS How the use of laxatives can make it difficult to diagnose the condition I also go through all of the medicines that you might be prescribed by Western Doctors and give you an idea of what to expect including ...A discussion of diphonoxylate and atropine and how these two drugs interfere with the passage of waste through your system to control diarrhea Why many experts consider diphenoxylate to be a narcotic that gets you high and why it is also considered to be as dangerous and addictive as any street drug The dangerous drug interactions that can occur if you are taking Nardil or Mantulane Why taking Imodium can have a negative impact on the muscle lining of your intestines and make the symptoms of the disorder even worse How some drugs that are commonly prescribed for IBM can stain and damage your teeth and cause problems with the throat and swallowing How the overuse of stool softeners can lead to serious problems such as laxative dependence, dehydration and electrolyte imbalance How the dry mouth caused by drugs used to control cramps (such as dicyclomine) can cause problems with excess sweating and dental decay Why antidepressants are almost always prescribed to people with IBM and the adverse affects of taking them long term
