

Arthur C. Clarkes Mysteries

The best of the many intriguing mysteries recounted in the popular, long-running television series Arthur C. Clarkes Mysterious World and Arthur C. Clarkes World of Strange Powers are here collected in one fascinating volume. Those who enjoy a good detective story and whose imaginations are fired by the unexplained will revel in these accounts of real-life conundrums that continue to baffle science. What two-legged beast could have produced the unusual footprints photographed in the Himalayas in 1978? Is it possible that our vast oceans contain gigantic, hitherto unknown sea creatures which occasionally surface and terrorize ships? How were the huge, perfectly spherical stone balls in the wilderness of Costa Rica produced? Will we ever understand how prehistoric peoples could have created the massive landscape drawings of South America, which are completely visible only from the air? These are just a few of the tantalizing enigmas that continue to elude scientific explanation. Authors John Fairley and Simon Welfare lead the reader on a thoroughly interesting investigation into all of these incredible phenomena and more. To each case Sir Arthur C. Clarke also offers his own analysis, full of the wit and intelligence that are his trademark. As he states in the introduction, The Universe is such a strange and wonderful place that reality will always outrun the wildest imagination.
