

New Departures in Marxian Theory (Economics as Social Theory)

Over the last twenty-five years, Stephen Resnick and Richard Wolff have developed a groundbreaking interpretation of Marxian theory generally and of Marxian economics in particular. This book brings together their key contributions and underscores their different interpretations. In facing and trying to resolve contradictions and lapses within Marxism, the authors have confronted the basic incompatibilities among the dominant modern versions of Marxian theory, and the fact that Marxism seemed cut off from the criticisms of determinist modes of thought offered by post-structuralism and post-modernism and even by some of Marxism's greatest theorists.
