

## Connect Access Card for Educational Psychology

John Santrock's Educational Psychology emphasizes the application of theory to real classroom practice. With richly evocative classroom vignettes from practicing teachers and a wealth of case studies, Educational Psychology helps students think critically about the research basis for best practices. Santrock's hallmark Learning System organizes the content into manageable chunks under learning goals, supporting retention and mastery, so that students will have an engaging and successful course experience. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective. It provides tools that make assessment easier, learning more engaging, and studying more efficient. For instance, Connect contains SmartBook, the first and only adaptive reading experience available for the higher education market. Powered by the intelligent and adaptive LearnSmart engine, SmartBook facilitates the reading process by identifying what content a student knows and doesn't know. As a student reads Educational Psychology, the material continuously adapts to ensure that he or she is focused on the content most crucial to closing specific knowledge gaps.
