

Prostate Health: Up-to-Date Research on Benign Prostatic Hyperplasia and Prostate Cancer

Nearly half of all men will have an enlarged prostate or BPH by age 60. An estimated 241,740 new cases of prostate cancer will be diagnosed in 2012. Prostate Health: Up-to-Date Research on Benign Prostatic Hyperplasia and Prostate Cancer is a comprehensive look at the latest research on improving prostate health and lowering the odds of developing one or both conditions. Only the most credible medical experts and health journals including the American Cancer Society, Mayo Clinic and British Medical Journal were referenced when compiling Prostate Health: Up-to-Date Research on Benign Prostatic Hyperplasia and Prostate Cancer.
