6. Pervasive Developmental Disorder (PDD)
7. Childhood Disintegrative Disorder (CDD)
8. Retts Syndrome
9. Tourettes Syndrome (TICS)
10. Learning Disabilities

## LETTER FROM THE AUTHOR

-----

Having a family member with Autism isnt easy! I know it because my elder brother is Autistic. Back in the early 80s the Internet was practically nonexistent. Even worse, was the lack of knowledge and social empathy around Autism and expert care was hardly affordable. Regrettably, except for rudimentary old school therapies, we could not do much to improve upon the social and learning difficulties that my brother encountered at that time. Consequentially, even today, he is only semi-functional in most of those aspects that we so take for granted in our lives. But in todays world, it doesnt have to be that way. With the amount of a Government grants propelled into research & development of Autism and the sheer abundance of knowledge that is shared across the Internet, both health and hope is not too far. Yes, with the right tools and early intervention techniques, we can BEAT Autism and help your child

successfully integrate into the society. And that is the mission we live by at DW Autism!! Speaking of tools, I have always felt that there has been an unavailability of a consolidated artifact listing some of the key tools and techniques that are available today for families with Autism - a singular GoTo handbook is what I mean. For less than the price of a cappuccino, this eBook serves that purpose. There is nothing remarkable about this book except for that fact that it is the ONE reference to look out for without searching aimlessly on the web - it contains neither groundbreaking research nor any breakthrough techniques that promises a cure for your loved one. Simply put, it is a compilation some proven tools and tips available publicly curated from the best of the web stuffs!! I hope you find it useful O
