

## Crisis and Hope: Theirs and Ours (PM Audio)

This audio recording of a historic address given by Noam Chomsky, one of the worlds leading intellectuals, offers an analysis of current world events, including the economic crisis and its structural roots, U. S. foreign policy under the Obama administration, and the social and economic interest driving both foreign and domestic policy. The tradition of worker self-management as a viable alternative to the business-as-usual approach of corporations and the government is also discussed in detail.
