

# Gluten: The Enemy Within A timely expose of all the lies about GMOs

A timely expose of all the lies about the deadly Genetically Modified Organisms in your diet. Before you consume another bagel or ham on rye read this book--it might save your life! Hundreds of hours of research inspired by reading Dr. William Davis Wheat Belly...have led to startling revelations everyone who consumes food should be aware of, now!The American public has been lied to for decades about what has been going on behind the closed doors of agribusiness labs creating Frankenfood and passing it off as safe for consumption. Monsanto is the leader and they have put up \$4.2 million to fight legislation demanded by concerned consumers that they must label food products made with genetically modified foods. Why are they determined to keep this secret? Read what Greenpeace discovered in the employee dining room at Monsanto. When the so-called food experts decided to improve on Mother Nature we all paid the price. We still are with higher rates of the incidence of diabetes, Alzheimers, joint replacement, arthritis, possibly autism and the American pandemic, obesity as well as other auto-immune diseases.Farming wheat and other foods has moved from growing foods that are healthy and life sustaining to downright dangerous to the health of us all. The oxymoron, EAT MORE HEALTHY WHOLE GRAINS is nothing more than a clever maneuver meant to assist agribusiness and the fertilizer/ insecticide businesses. Congress provided a slippery loophole for agribusiness by agreeing with them that after altering chromosomes and genes in our wheat and doing no human testing to determine if there might be ill effects that, Hey, its still just wheat. I learned so much from Dr. Davis, I decided to do my own intensive research and dug out a wealth of additional information regarding the scams, lies and misleading information disguised as truth disseminated

to the American public. Are we to suffer from the elimination of science meant to improve the life of American citizens, or, perhaps, are we the new guinea pigs being morphed into a new race of GMO based creatures? Maybe the Mayan predictions are just this, the end of life in its present form and the beginning of the new breed of humans, genetically modified from the inside out. You are what you eat!!! If you are obese or just sick of that post-menopausal frontal pouch, scored too high on a blood sugar test, have already slipped into diabetes, etc. or simply want to live long and be healthy please read this book. It changed my life and it will yours. Beware!.
