

# Restructuring Personality Disorders: A Short-Term Dynamic Approach

Therapists working with personality-disordered clients must contend with both the complex and often treatment-refractory nature of the Axis II disorders themselves and the growing reluctance of third-party payers to assume the costs of extended treatment. Presenting a flexible, short-term dynamic model, this book shows how to conduct successful therapies with this population. The author synthesizes the work of pioneers in the field of short-term therapy and adds components from a range of other approaches, emphasizing active defense analysis and empathic affirmation of the clients core self. With step-by-step guidelines and extensive case material, the volume demonstrates how to bring about rapid and enduring changes in personality-disordered clients.
