

Insects and Diseases(Annotated): A Popular Account of the Way in Which Insects may Spread

CONTENTS	CHAPTER	I	PAGE	
PARASITISM	AND	DISEASE	1	
Definition of a parasite, 1; examples among various animals, 2; Parasitism, 3; effect on the parasite, 4; how a harmless kind may become harmful, 5; immunity, 6; Diseases caused by parasites, 7; ancient and modern views, 7; Infectious and contagious diseases, 8; examples, 9; importance of distinguishing, 9; Effect of the parasite on the host, 9; microbes everywhere, 10; importance of size, 11; numbers, 11; location, 11; mechanical injury, 12; morphological injury, 13; physiological effect, 13; the point of view, 14.				
CHAPTER II	BACTERIA	AND	PROTOZOA	15
Bacteria, 15; border line between plants and animals, 15; most bacteria not harmful, 15; a few cause disease, 15; how they multiply, 15; parasitic and non-parasitic kinds, 17; how a kind normally harmless may become harmful, 18; effect of the bacteria on the host, 18; methods of dissemination, 18; Protozoa, 19; Amoeba, 19; its lack of special organs, 19; where it lives, 19; growth and reproduction, 19; Classes of Protozoa, 20; the amoeba-like forms, 20; the flagellate forms, 20; importance of these, 21; the ciliated forms, 22; the Sporozoa or spore-forming kinds, 22; these most important, 23; abundance, 23; adaptability, 23; common characters, 24; ability to resist unfavorable conditions, 24.				
CHAPTER III	TICKS	AND	MITES	26
Ticks, 26; general characters, 27; mouth-parts, 27; habits, 27; life-history, 27; Ticks and disease, 28; Texas fever, 28; its occurrence in the north, 28; carried by a tick, 29; loss and methods of control, 31; other diseases of cattle carried by ticks, 31; Rocky Mountain spotted fever, 32; its occurrence, 32; probably caused by parasites, 32; relation of ticks to this disease, 33; Relapsing Fever, 33; its occurrence, 34; transmitted by ticks, 34; Mites, 35; Face-mites, 35; Itch-mites, 36;				

Harvest-mites, 37. CHAPTER IV HOW INSECTS CAUSE OR CARRY DISEASE 40 Numbers, 40; importance, 41; losses caused by insects, 41; loss of life, 42; The flies, 43; horse-flies, 43; stable-flies, 44; surra, 45; nagana, 45; black-flies, 46; punkies, 46; screw-worm flies, 47; blow-flies, 48; flesh-flies, 48; fly larv? in intestinal canal, 49; bot-flies, 50; Fleas, 52; jigger-flea, 53; Bedbugs, 54; Lice, 54; How insects may carry disease, 55; in a mechanical way, 55; as one of the necessary hosts of the parasite, 56. CHAPTER V HOUSE-FLIES OR TYPHOID-FLIES 57 The old attitude toward the house-fly, 57; its present standing, 58; reasons for the change, 58; Structure, 59; head and mouth-parts, 60; thorax and wings, 61; feet, 62; How they carry bacteria, 62; Life-history, 63; eggs, 63; ordinarily laid in manure, 63; other places, 63; habits of the larv?, 64; habits of the adults, 64; places they visit, 65; Flies and typhoid, 65; patients carrying the germs before and after they have had the disease, 65; how the flies get these on their body and distribute them, 66; results of some observations and experiments, 66; Flies and other diseases, 68; flies and cholera, 68; flies and tuberculosis, 69; possibility of their carrying other diseases, 70; Fighting flies, 71; screens not sufficient, 71; the larger problem, 71; the manure pile, 72; outdoor privies, 72; garbage can, 72; cooperation necessary, 72; city ordinances, 73; an experts opinion of the house-fly, 73; Other flies, 75; habits of several much the same but do not enter house as much, 75; the small house-fly, 75; stable-flies, 75; these may spread disease, 75. CHAPTER VI MOSQUITOES 76 Numbers, 76; interest and importance, 76; eggs, 77; always in water, 77; time of hatching, 77; Larv?, 78; live only in water, 78; head and mouth-parts of larv?, 78; what they feed on, 78; breathing apparatus, 79; growth of the larv?, 80; Pup?, 80; active but takes no food, 80; breathing tubes, 80; how the adult issues, 81; The Adult, 81; male and female, 81; how mosquitoes sing and how the song is heard, 82; the palpi,

82; The Mouth-parts, 83; needles for piercing, 83; How the mosqui
