

# MERS INFECTION: Signs You May Have It: Symptoms, Travel Advisory, Transmission, Treatment, Prevention

Protecting Yourself Is Also Protecting Your Loved Ones Take Extra Precautions and Stop the Spread of MERS Infections. This text discusses important aspects of the disease and the virus that causes the condition. Inside are issues about the infection and include: (1) an overview of Middle East Respiratory Syndrome (MERS), its signs and symptoms, and the virus that causes it, (2) the epidemiology of the disease, (3) the possible sources of the virus, (4) how an individual or the population get the infection, (5) travel advisory to people, (6) when to see a doctor, (7) the diagnosis and treatment drugs combination that is found effective in reducing virus replication and improving clinical outcome, (8) protection from getting the infection, (9) guidance for preventing MERS-CoV from spreading in homes and community, (10) on-going research, (11) findings, and (12) the countries that are now affected by the disease. The virus is continuously spreading, and has now reached the United States of America. I am wishing for a quick solution to this problem and hoping that we all take extra precautions by following the guidelines on how not to acquire and spread the disease to the population. Everyone, please be careful! Thanks!
