

Those Rainbow Trousers

Those Rainbows Trousers--Adventures of an Optimist, is a rite of passage and humorous novel that charts the many ups and downs of happy-go-lucky, antique dealer Billy Baxter who, on reaching sixty, begins to worry that all is not as it could have been. Several stories, biographical in nature with a patina of fiction, highlight fearless feats of daring-do, with Billy's unexpected and rewarding finds at jumble sales and market stalls creating outstanding signposts to his exceptional life as an antique dealer. Charismatic characters in the UK and America make their contributions to his jumps into and out of disastrous events. In spite of everything that life can throw at him, Billy charmer, chancer, wheeler-dealer and collector maintains that given the slightest opportunity things can only improve. His mantra being, in the words of Peter Ustinov, The point of living, and of being an optimist, is to be foolish enough to believe the best is yet to come. Billy plies his trade back and forth across the Atlantic while coping with family life in general and with his wife, Carol, who fails to see the excitement in broken down furniture and cannot understand the need to have a large van, a small van and two Jaguars parked in the drive when she prefers to take the bus, and children who would rather own a moped than Ricardo the pet donkey. Nor, can she appreciate the appeal of overly expensive, worn out items once owned by famous and infamous celebrities while she and the twins, Lizzie and Edward, do without. Billy has, so far, been unable to convince Carol of his take on life. The happy outcome of their differences begins to reveal itself when Billy, anticipating a BBC interview, is hit between the eyes with conflicting euphoria and guilt and suffers a life-changing event when he realizes he may have to reveal everything about his collection, including the whereabouts of that costly pair of Jimi

Hendrixs trousers.
