Experience will be gained in the next, two years as to the amount of supply from the springs of the Bahr Yusif which failed so markedly in 1880. The people will have to take to economising water by lifting it by machines It is certain that for the next five years nothing can be done to seriously increase the available supply entering the Ibrahimiya at Asyut and thus the Fayum will always be liable to excessive diminution of supply in the month of June.)isohuivs. 04.--The following table shows the discharges entering the Fayum compared with those entering the Bahr Yusif at Derut. The difference shows the approximate amount of filtration in the Bahr Yusif. Minimum gauges Derut 05.--The discharge of 500,580 M9 on 9th July appears to be erroneous as the Derut gauge varied very little between 20,h June and J 0th July. The minimum gauge in the Bahr Yusif was reached on June 28th. After that the discharge rose daily. The gauge readings Bahr Yusif from June 20th to July 10th are as follows at Derut. Progress of Dredging. Rayah Beherah. 00.--The Rayah furnished a small quantity of water during the summer of 1889, the
