

The archipelago economy: Unleashing Indonesia's potential

In this report, the McKinsey Global Institute (MGI) discusses the recent record of the Indonesian economy, looks at its future prospects, lays out the policy priorities for government and business that might best maintain the economy's momentum, and, finally, discusses the potential size of the private business opportunity in Indonesia to 2030.

The archipelago economy: Unleashing Indonesia's potential Indonesia's fast-growing economy could become the world's 7th largest by 2030, up from 16th today, but only if it can further boost productivity to meet growth targets.
