

The Developers

Before Facebook made it big, there was an odd assembly of quasi-geeks building a social networking site for a small Midwestern city. However, fast food addiction, incessant sexual tension and heated bingo competition constantly distract the team. While the opportunity arises to build the first nationwide, government-sponsored high-speed Internet portal, the issue comes second to Matts relationship with Katy, the teams co-leader. They cannot hate each other enough to halt their steamy romance, but they cant love each other enough to share anything but a fish dinner. The Developers mixes the insane and obscene with technology, romance and pop culture. But while the books web development group tries to make its mark on the virtual world, it encounters pre-eminent issues that will soon be shaping the Internet of the future: Are individuals losing their remaining privacy due to the World Wide Web? Will online social interaction eventually replace in-person gatherings as a necessary means?
