

The Magic of Fabric

The most original magic book on the market today! Let the power of fabric change your life! I would recommend this to any practitioner of magic: wiccan, voodoo, hoodoo, whatever, trust me, you can use this book. -DJ Colbert Fabric is such a huge part of our lives. It decorates our homes, lines the interiors of our cars, and shelters our bodies from the elements. It holds a huge opportunity for magic. Imagine if you could make a truly powerful Power Suit to help you up the corporate ladder. Or how about slipping into something a little more comfortable that also happens to deepen the love between you and your partner? The possibilities are endless. Over twenty years of experience in witchcraft, Hoodoo and Voodoo combine here with a degree in Fashion Technology, to make these unique spells. In this book, I teach you about the magic each particular type of fabric holds, including the symbolism in the patterns printed on them and the colors they are dyed. I show you how to take this magical potential and utilize it through spellwork to empower and enrich your life through spells covering a wide variety of needs, including enhancing Beauty, Health, Protection, Prosperity, Luck, Power, Love, and more. The spells can be altered to suit male or female and gay or straight individuals, so practically every spell can be used by any individual. Dont you just hate it when you buy a book of spells and only half of them are even applicable to you? Not in this book. Not only do I give you an extensive selection of spells and references to make your own spells, but I show you how to sew your own garments, include clothing patterns, and even show you how to weave your own material. This is all youll need to know to practice fabric magic in one easy to follow book! Surround yourself in magic! Scroll up and grab your copy today!
