

The GCC in the Global Economy (The Gulf Region: Economic Development and Diversification)

Changing geopolitical realities have seen the Gulf region turning to Asia and Africa to build new economic links, while strengthening old ones. This proactive internationalism is visible not just in economics and energy, but also in politics and security where a host of new agreements has been developed. This work provides an overview of the ways in which the GCC states now need to move ahead with reforms. The work brings together state-of-the-art analysis by international scholars who participated in a major joint initiative by the EU and the GCC, the al-Jisr Gulf-Europe Research Program.
