

The Violence of Petro-Dollar Regimes: Algeria, Iraq and Libya. Luis Martnez

During the 1970s, owing to their oil rents, Algeria, Iraq and Libya all seemed engaged in a swift modernization process. Oil was the godsend that would enable these states to catch up economically. Algeria was a Mediterranean dragon, A Libya an emirate A and Iraq the rising military power A of the Arab world. From a political perspective, progressive socialism suggested that profound changes were underway: womens liberation, urbanization, education for all, longer life expectancy and so on. A few decades later, the disillusion is a cruel one. The sense of wealth led these countries to undertake political, economic and military experiments that would lead to impasses with disastrous consequences that they are still trying to overcome. How did it all happen? Can these countries dispense with far-reaching reforms? Can the EU export its norms and values and protect its gas supply? The present work offers the first global approach to the subject.
