

This Place Is Cold: An Imagine Living Here book

Can you imagine living in a place where it's so cold your breath turns instantly into tiny ice crystals that glitter in the sun? Where temperatures can drop fifty degrees below zero and even lower and the sun only comes out for a few hours per day? In *This Place Is Cold* readers will learn how people and animals survive in Alaska's ferocious cold, and how because of global warming this region is now in trouble. Vicki Cobb and Barbara Lavallee travelled the world together to research this groundbreaking geography series, that is now updated and redesigned to appeal to today's readers.
