

Understanding Chronic Pain: A Doctor Talks to His Patients

This is a personal narrative, a record of my passage among victims of chronic pain and the discoveries that have come from those encounters. I write for physicians, nurses, therapists, and caregivers, but mostly, I write for you who suffer the disease. I know you very well, perhaps as well as anybody in the world. I have listened to your stories with patience and attention, and I have been greatly rewarded. You have trusted me with the deep recesses of your thoughts and fears, and the memories of the dreadful experiences that are so often the origin of chronic pain. I have treated thousands of you and I believe I have some understanding of your illness. I offer a series of essays about people like you who suffer chronic pain. From their case histories, I derive certain conclusions. Some conclusions are bold and imaginative. Some are disturbing and frightful. Not all of them will apply to you, but some certainly will. My wish is that you gain greater understanding of you.
