

Intelligent Design in Science, Religion and You

The text begins with asking if God belongs to a particular religion or if he is partial to a political party. Parallels on where religions agree are stressed rather than where they differ. In a scenario the author presents six major religious leaders ask questions on how Intelligent Design works in their religion. The reader is asked to answer eighteen questions relating to his or her religion and possible prejudices of other religions. The composite of the book's ideas are brought together under the heading, The Key to Survival. Intelligent Design points out that the molecular design of the universe is the basis and confirmation of religious beliefs.
