

Albee: Whos Afraid of Virginia Woolf? (Plays in Production)

This is the first detailed study of one of the most important plays in contemporary theater. In this fascinating look at the modern stage, Stephen Bottoms draws on original archival material and sources including an exclusive interview with Edward Albee. The Introduction considers the text of the play itself; part one provides a survey of the major productions from 1962 to 1999, including the film. Part two examines shifting critical responses to the play and the third and final part offers a detailed examination of five different performances.
